

The committees and sectoral committees are where Alastria's activity happens, with members engaging and working to further advance blockchain technology. The committees address the cross-cutting, multi-sectoral impact of blockchain deployment, while the sectoral committees focus on solving challenges and adding value to this technology in a variety of industries with the support of all relevant stakeholders.

At Alastria we work with a decentralised approach and rely on the strength of local **ECOsystems (ECOs)** to foster talent and develop use cases in each territory.

Research and Technology Transfer Committee

Promotes applied research in the field of decentralised technologies and the relationship with universities and higher education centres.

LEADERS

ESG Committee

Maximising the positive impact of Alastria's activity on the environment, society and good corporate governance, as well as supporting members in their contribution and impact. Defining the principles of sustainable and responsible blockchain and leveraging its use.

LEADERS

Arts and Digital Culture Sectoral Committee

Builds synergies to speed up blockchain uptake in this industry for the market's key players: artists, platforms and investors. It has three working groups: legal and tax, functional and technological.

LEADERS

Javier Ibáñez (ICADE/Comillas)

Ricardo Palomo (CEU)
