The Complete Flutter Development
Bootcamp with Dart

Jagjot Singh

Software Engineer at Trential (formerly CRUBN)
Delhi, India

Summary

I've experience working with - Typescript, React, Next.js, Node, MongoDB, PostgreSQL and GraphQL. I'm open to full stack or frontend (React) roles.

Experience

Trential

Software Engineer

October 2021 - Present (3 years 4 months)

- Utilized React and React Native to develop several responsive web and mobile apps.
- Developed Trential's issuer portal from the ground up and worked on the corresp. mobile app, facilitating the issuance of digital degrees to thousands of students.
- Refactored the code to optimize web vitals, and led the initiative for codebase migration to TypeScript, which significantly helped in making the code organizable, maintainable, and less error prone.
- Led the development of IIT-K's access portal and worked on the mobile app - currently being utilized by students to check in and out of different zones marked within the institute's premises.
- Collaborated with cross functional teams, including backend developers, designers, and project managers, to deliver user-focused features following agile methodology.

Self-employed

Freelance Developer

May 2020 - July 2021 (1 year 3 months)

- Worked on the redesign of web and mobile applications for clients.
- Facilitated the integration of APIs and analytics.

Alorine

Mobile Application Developer

February 2020 - April 2020 (3 months)

- Utilized Dart and Flutter to implement a cross-platform blog app for a client.
- Added several features including like, comment, and sharing of blog posts.

FlashChat

Mobile Application Developer

October 2019 - December 2019 (3 months)

Developed a cross-platform messaging application using Flutter and Firebase which got over 5000 downloads on the Play Store
