Summary

Transforming User Experiences in the Blockchain Space

Hello! I am an accomplished Designer with a passion for creating
exceptional user experiences. With a Bachelor's degree in
Architecture from BIT Mesra and a Master's degree in Design from
IIT Kanpur, I have cultivated a unique blend of artistic sensibility and
technical expertise.

Currently, I am making significant strides as the Lead Product
Designer at Trential, a groundbreaking blockchain-based verifiable
credentials identity management company. In this role, I am at
the forefront of designing a comprehensive suite of products that
revolutionize identity management through blockchain innovation.
Working with a team of talented designers, developers and product
manager, I oversee the creation and implementation of user-centric
designs for cutting-edge products within Trential's product suite.
By leveraging my expertise in UX/UI design, I ensure seamless
interactions, intuitive interfaces, and a delightful user journey across
the entire product ecosystem.

My journey as a Design Consultant has allowed me to collaborate
with various organizations, including Vmock, Garuda Books, Innobit
System, Plumster (US), and eHealthServe (US). These experiences
have broadened my design horizons, enabling me to work across
diverse domains and develop a versatile perspective on crafting
compelling digital solutions.

In addition to my consulting work, I have been closely associated
with the National Blockchain Project and CRUBN since 2020.
These engagements have offered me invaluable insights into
Blockchain-based Healthcare ecosystems and Land Records
Management Projects. Deepening my understanding of blockchain

technology's potential, I continually seek to apply this knowledge to drive innovation and transformation at Trential.

I am always eager to connect with fellow design enthusiasts, industry professionals, and individuals who share a passion for innovation. If you're interested in discussing the latest design trends, exploring opportunities, or simply connecting, I invite you to reach out. Let's engage in meaningful conversations and collaborate to push the boundaries of design, leveraging technology to create remarkable experiences that leave a lasting impact.

Experience

Trential
Product Designer
August 2022 - Present (2 years 6 months)

Led the design of the Trential wallet and Trential Suite, India's largest blockchain-based digital degree issuance service, with over 2 million credentials issued to date.
